Hi Priscilla!

I agree that the technical parts of permitting are like a whole different language ☺. I'm glad that I was able to help make it a little easier to understand. I do wish we could have had the training in person too, but with budget and travel restrictions, that just isn't possible right now. If you do want to learn more about permitting, you really should check out the links below. And if you have specific questions or topics that you want to learn more about, give me a call. Maybe we can find you more information on it, or set up some time for you to talk with Cindi or Miriah 1 on 1. I definitely think communicating and coordinating with each other about this is a good idea. I'd suggest you call and talk with Violet from Port Graham or Lisa from Chickaloon about that. I believe these permits are usually good for 5 years, but they can be administratively extended, and are often re-issued for another 5 years after that.

Hi Katherine, man this was a whole different language for me. I didn't attend the meeting in February at the Federal Building because the Council wanted to attend it. It made it easier to understand when you were asking

the questions. I hope to learn more about this this topic, both Nancy and I. I was trying to ask if we could all keep our communications open with each other but I didn't get a chance to say anything. This was pretty overwhelming and in a way I wish we could have done this in a building to get a better understanding of it. It was hard for me to understand most of the language and acronyms. It's probably to late to request the training to be done in person next time. How long is this permit going to last for like how many years. I am glad we got to be a part of this. Thank you

Priscilla
